Berlitz Language: Beginning Spanish for grades K-2nd**

The Berlitz Spanish class for young learners is designed to provide foundational knowledge of Spanish using the Berlitz Method of Instruction, a method that has been proven effective over 140 years. The group environment fosters interaction between student and instructor through age-appropriate curriculum that will enhance language skills and foster a global perspective. Each lesson will be conducted entirely in the target language and will have a communicative goal. The program includes: • Language learning based on the conversational Berlitz Method® • Specially trained native-fluent instructors • Ample opportunity for speaking, listening, and engaging with others • Age-appropriate curriculum and materials. Age appropriate groups

Sound Formation Percussion**

4 Levels of Curriculum for New and Returning Students. In this unique class you'll learn an easy way to truly master rhythm. The proprietary tools and method we teach allow you to transfer your groove onto any other instrument with our guidance later on or just get awesome at percussion now! Strategic and fun games develop your listening skills, performance ability, and overall musicality. The fundamental math involved in rhythm is explained at grade specific levels. We use a beautiful blend of hand-percussion instruments like djembe, cajon, darbuka, claves and more. Our teachers have degrees, Masters degrees, and even Ph.Ds in music.

Science Matters: Extreme Electricity/Mixology**

Extreme Electricity: Zap! Electrify your interest as we build a working telegraph, experiment with conductors and insulators, build an electromagnet, and much more. This club takes electricity to the extreme! We'll charge up those electrons and send them spinning around the room. It's zapping science that will give your brain a charge! Mixology: Are you ready to mix things up a little! Join us in the lab as we experiment with some crazy chemical reactions! We'll heat things up and cool things down with the greatest mixing stuff in town. Mix up some Oobleck. Use chemistry to solve the Mixed Up Mystery. Mix things that bubble without trouble. This is fun chemistry that needs no apology...this is the science we call Mixology!

Nexlore: Drones**

Nexlore Drones is an Aerospace engineering course designed for students to be able to design their drones and encourage students to explore different drone-based careers. Students interact with state-of-the-art drones and learn how to pilot, how to log a flight while encouraging them to act as inventors in their own safe space. Students build and personalize their own remote-controlled drones to complete missions, based off of real-life scenarios; such as flying medicine to a remote part of the African savannah or delivering mail a few blocks over in your neighborhood to a friend! Drone usage is a cutting-edge skill that is on the rise of demand in today's age. Drones in the air up, up, and away!

Craftsman & Apprentice: Things That Move**

In our Things that Move Afterschool Club, we'll design and build all sorts of playthings with locomotion. Makers will explore simple machines by creating toys and gadgets with moving parts like wheels, pulleys, screws, and ramps. Things that Move is the perfect club for those crafty kids with a mind for engineering and problem-solving. Makers will build projects like wooden rolling toys, marble runs, pom-pom catapults, Ferris wheels, and Rube-Goldberg style Mouse Trap games. We'll practice skills like design thinking, problem-solving, collaboration, prototyping, and constructive feedback while making super fun toys that really move.

MAD SCIENCE: Crazy ChemWorks**

Ooze into action, manipulate matter and witness some radical reactions in this exciting Chemistry-themed after school program from Mad Science! Slide down the colorful pH scale and dip into the science of acids and bases. Learn to recognize chemical changes and mix ingredients together for some sensational results. Make your own ooey, gooey Mad Science slime to take home! From proper use of equipment and lab safety to molecular structure and more, this innovative program explores the exciting world of basic chemistry! Grab your lab coat and let's head to the laboratory for some Crazy ChemWorks!

Sound Formation: Music Production**

Make beats, tracks, and grooves while learning the science behind it with the Sound Formation Method™. Recommended for students with a musical background, however beginners are also welcome. In this fun environment you'll be able to explore a variety of sounds, rhythms, and musical equipment and come away with your own creations! All production gear is provided (e.g. Ableton, MacBook Air, midi keyboards, controllers, headphones, analog synthesizers, etc).

Teachers have undergone intensive training in our curriculum in addition to graduating in music production at CU Denver.

Omniform Karate**

Omniform is martial art that develops the mind, body and the character of the student. It's a blend of Tae Kwon Do, Karate, Boxing and Yoga. The intention of the training is to empower the student to consciously and deliberately develop his or her own unique power - a power of self-confidence, strength and leadership that attracts positive experiences around them. We welcome students with no martial arts experience as well as students with previous experience. The cost of a uniform, jump rope and gear pack and study guide is \$77, which you can purchase directly from the instructor. Missed classes can be made up at our studio location.
